

reSAWN TIMBER co.™

PREMIUM WOOD SOLUTIONS  
FOR BUILDERS & CONTRACTORS

At reSAWN TIMBER co., we provide premium, sustainable wood solutions designed for builders, offering exceptional quality, durability, and long-term value. Our reliable materials minimize callbacks and save time and costs over the lifecycle of the build. Beyond materials, we partner with you at every stage, providing technical support and expert guidance to ensure your project's success. Renowned for our high-quality products and reliable, on-time delivery, reSAWN is committed to supporting your vision from start to finish. With sustainability at our core, our eco-friendly craftsmanship helps you achieve environmental goals without compromising quality. At reSAWN, we're more than a supplier—we're your dedicated partner in building smarter and better.

### **Express Ship Program**

reSAWN TIMBER co.'s Express Ship Program offers construction professionals a streamlined, expedited route to procure premium wood cladding materials. This program is tailored to meet the fast-paced nature of modern projects, aligning tight deadlines with the demand for superior materials. The program currently offers selections from Abodo, Accoya, and Sylva with a diverse array of color choices to suit various design preferences. The wide range of options ensure builders have access to a variety of choices without compromising quality or craftsmanship.

## **Why Builders & Contractors Choose reSAWN TIMBER co.**

### **Quality**

Our premium wood solutions are crafted with precision and care, ensuring consistent, high-quality finishes that elevate every project and meet the most demanding design standards.

### **On-time & Fast Delivery**

With streamlined processes and efficient logistics, we ensure your materials arrive on time, keeping your projects on schedule.

### **Installation Support**

We provide recommended best practice installation methods to ensure long term performance.

### **Experience**

We have a deep history in working with large-scale, complex, commercial and residential projects.

### **Technical Support**

Our team is here to support you, offering expert guidance, troubleshooting, and training to help you achieve success with confidence.

### **Long and Short-Term Cost Savings**

Our technical assistance and reliable materials streamline project execution, reducing callbacks, and ensuring long-term savings.

### **Durability**

Engineered for exceptional resilience, our wood products are built to withstand wear and tear in the toughest environments, delivering performance you can rely on.

### **Tailored Solutions**

We offer custom capabilities to achieve design intent while maintaining functionality.

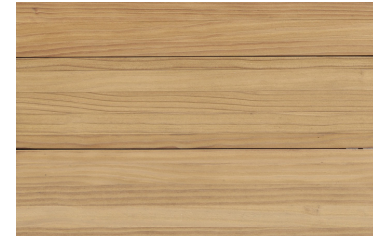

Vulcan thermally modified wood cladding is created from New Zealand plantation timber. The thermal modification process gives Vulcan cladding superior stability and reduced resin content. It's naturally durable so the timber doesn't require any chemical preservatives, and has a beautiful, consistent brown tone.

**Abodo® Vulcan Shingles**

Abodo Vulcan shingles are created using Vulcan timber, resulting in a product with all the beauty, durability and stability of this thermally modified eco-timber. The durability of the product is furthered by a low-VOC, water-based OPX preservative treatment that guards against mold and insects. It is also lightweight, making it easy to install and maintain.

VOYA

Accoya® 

Interior/Exterior Cladding

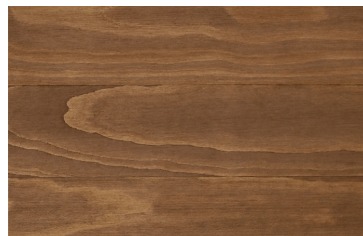

Accoya is wood, but not as you know it. It is a modified timber that undergoes a process called acetylation, which enables it to resist rot, defy the elements and stay strong for decades. Guaranteed for 50 years above ground and 25 years in ground or freshwater, its performance and properties are remarkable.

### Accoya® Pre-Fabricated Corner Pieces

reSAWN offers custom pre-fabricated corner pieces designed for seamless wood cladding installations. The expertly crafted mitered corners provide a precise, high-quality finish that enhances both durability and aesthetics. By eliminating the need for on-site cutting, these pre-fab corner pieces save time while ensuring consistency across projects. Available in a variety of wood species and finishes, they integrate effortlessly with reSAWN's range of exterior and interior cladding options, delivering a refined, architecturally cohesive look. **Sylva™**

*Interior/Exterior Cladding*

Sylva features wood cladding that is sourced from abundant and sustainably grown U.S. forests. Currently, our offering consists of thermally modified North American Red Oak products that are locally sourced and manufactured in Pennsylvania. They are stable, weather-resistant, FSC®-Certified, and comply with Wildland Urban Interface (WUI) requirements, ensuring their longevity. Sylva is supported by a 25-year warranty against rot and decay.

## Western Red Cedar

*Interior/Exterior Cladding*

Western Red Cedar is one of North America's great renewable resources. In addition to its prominence as a sustainable exterior material, it's very durable and is one of the lightest commercial softwoods. It is an abundant and popular tree in the Pacific Northwest region of North America.

## Alaskan Yellow Cedar

*Interior/Exterior Cladding*

reSAWN offers Alaskan Yellow Cedar (AYC) as a sustainable exterior/interior material, prized for its exceptional durability, natural resistance to decay, and fine, uniform grain. Sourced responsibly, AYC is a highly stable softwood that weathers beautifully over time, making it an ideal choice for interior/ exterior cladding, and soffits.

## Wood Flooring

reSAWN TIMBER co. provides new and reclaimed wood products for flooring. Our offering features the highest quality materials, milled to exacting standards and finished to enhance the natural beauty of the wood. We provide over 40 varieties, including European White Oak, North American Black Walnut, North American White Oak, and Reclaimed flooring products in both solid and engineered construction.

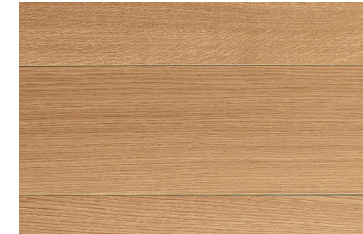

## European White Oak

*Flooring, Interior Wall/Ceiling Cladding, Millwork & Stairs*

The European White Oak products from reSAWN TIMBER co. features wide plank flooring, wall cladding, and millwork/stairs that are prefinished and available in engineered plank construction. The engineered material comes standard at 5/8" thick with a substantial 4 mm wear layer, or 3/4" thick with a full 6 mm wear layer for a truly superior product. The 7" face width showcases the full character and grain pattern that European White Oak has to offer.
